## Advanced Brain Training

**ABT** has proven successful for individuals seven years of age and older.  
**More information...**

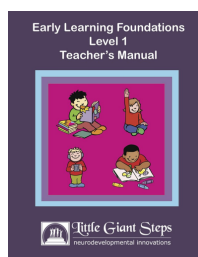

## Individual Evaluation

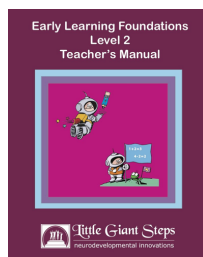

Everyone, old or young, labels or no labels, gifted or developmentally-challenged could benefit from an individual evaluation. These evaluations offer an in-person, academic and developmental assessment at one of our evaluation sites. An individualized NeuroDevelopmental brain training program is then designed and parents are trained to complete the activities at home over a four month period.

**Early Learning Foundations** does include key math skills, but one of the main goals of the program is neuro (brain) development. Strong pathways in the brain can mean the difference between a skillful or struggling learner. These vital pathways can be thought of as highly developed highways moving information from the brain to the body. It is called the Neuro-educational Approach.
