

**Early Learning Foundations** does include key math skills, but one of the main goals of the program is neuro (brain) development. Strong pathways in the brain can mean the difference between a skillful or struggling learner. These vital pathways can be thought of as highly developed highways moving information from the brain to the body. It is called the Neuro-educational Approach.

Age 6-7

**Visual Object Sequence Cards**

The Visual Object Sequence activity, provided in this set, works to expand the child's visual short term memory by short, fun, intense sessions of visual memory practice.

Contains 60 sets of cards (two of each object) with appealing, full color pictures of food, animal, toys and other common objects.

For ages 3-7 or children and adults with disabilities of any age. Instructions are included for two levels of difficulty.
